FFO per common share - diluted	\$ 0.47	\$ 0.41	\$ 1.31	\$ 1.25

FFO is defined as net income (computed in accordance with GAAP), excluding gains (or losses) from sales of depreciable property, premiums or original issuance costs associated with preferred stock redemptions, plus real estate depreciation and amortization, and after adjustments for unconsolidated partnerships and joint ventures. This definition conforms with the National Association of Real Estate Investment Trust's definition issued in April 2002. UDR considers FFO in evaluating property acquisitions and its operating performance and believes that FFO should be considered along with, but not as an alternative to, net income and cash flows as a measure of UDR's activities in accordance with generally accepted accounting principles and is not necessarily indicative of cash available to fund cash needs.

RE3 gain on sales, net of taxes, is defined as net sales proceeds less a tax provision and the gross investment basis of the asset before accumulated depreciation. We consider FFO with RE3 gain on sales, net of taxes, to be a meaningful supplemental measure of performance because the short-term use of funds produce profits which differ from the traditional long-term investment in real estate for REITs.

UDR
Income From Discontinued Operations
September 30, 2007
(Unaudited)

FASB Statement No. 144, “ *Accounting for the Impairment or Disposal of Long-Lived Assets*” (FAS 144) requires, among other things, that the primary assets and liabilities and the results of operations of UDR’s real properties which have been sold subsequent to January 1, 2005, or are held for disposition subsequent to January 1, 2005, be classified as discontinued operations and segregated in UDR’s Consolidated Statements of Operations and Balance Sheets. Properties classified as real estate held for disposition generally represent properties actively marketed or contracted for sale which are expected to close within the next twelve months.

For purposes of these financial statements, FAS 144 results in the presentation of the primary assets and liabilities and the net operating results of those properties sold or classified as held for disposition through September 30, 2007, as discontinued operations for all periods presented. The adoption of FAS 144 does not have an impact on net income available to common stockholders. FAS 144 only results in the reclassification of the operating results of all properties sold or classified as held for disposition through September 30, 2007, within the Consolidated Statements of Operations for the periods ended September 30, 2007 and 2006, and the reclassification of the assets and liabilities within the Consolidated Balance Sheets as of September 30, 2007 and December 31, 2006.

For the nine months ended September 30, 2007, UDR sold 12 communities with a total of 3,435 apartment homes, 50 condominiums from two communities with a total of 640 condominiums, and one parcel of land. At September 30, 2007, UDR had two communities with a total of 590 condominiums and a net book value of \$40.9 million, and one commercial unit with a net book value of \$0.4 million included in real estate held for disposition. For the nine months ended September 30, 2006, UDR sold 22 communities with a total of 6,768 apartment homes and 351 condominiums from four communities with a total of 612 condominiums. The results of operations for these properties are classified on the Consolidated Statements of Operations in the line item entitled “Income from discontinued operations, net of minority interests.”
